Kaili Zhao

Assistant Professor
Beijing University of Posts and Telecom.
No. 10 Xitucheng Road, Haidian District
Beijing, China 100876

Cell: (+86) 15201646826
Email: kailizhao@bupt.edu.cn
kaili.zhao0619@gmail.com
Github: https://github.com/zkl20061823

Research Interests

My research interests are in **computer vision** and **machine learning**. I have developed techniques spanning over structured multi-task learning, weakly-supervised learning and deep learning. I also lead research projects in facial expression analysis, AU detection and image segmentation.

Degrees

Ph.D. (2016) in Information and Signal Processing, Beijing University of Posts and Telecom.
B.S. (2010) in Automation, Hefei University of Technology

Research Grants

- Principal Investigator, "Crowd Counting on Street-view Images," with DOCOMO Beijing Communications Laboratories Co., Ltd., 03/2019–08/2019. CNY ¥250, 000 (USD $40,000)
- Principal Investigator, "Drone-based Image Processing for Crack Inspection," with DOCOMO Beijing Communications Laboratories Co., Ltd., 06/2018–08/2019. CNY ¥200, 000 (USD $30,000)
- Principal Investigator, "Weakly-supervised Spectral Clustering and Its Application to Recognize Facial Expressions in 1 Million Facial Images," with National Natural Science Foundation of China, 09/2017–12/2020. CNY ¥300, 000 (USD $40,000)
- Co-Principal Investigator, "Depression Detection Model based on Automated Facial Action Unit Analysis," with Institute of Mental Health, Beijing Anding Hospital (top psychiatry and mental health hospital in China), 11/2017–11/2021. CNY ¥1000, 000 (USD $156,000)
- Principal Investigator, "Multi-label Learning for Facial Action Unit Detection," with Fundamental Research Funds for the Central Universities, 07/2017–10/2018. USD CNY ¥150, 000 (USD $20,000)

Research Experience

- **Crowd Counting on Street-view Images** 03/2019–08/2019
  DOCOMO Beijing Labs, Beijing
  - Developed a crowd counting module for "AI Box" product of DOCOMO Labs.
  - Filed one patent in China (in confidential status)
- **Drone-based Image Processing for Crack Inspection** 06/2018–08/2019
  DOCOMO Beijing Labs, Beijing
  - Developed a deep U-shape model for inhomogeneous pixel-level crack detection.
  - The proposed deep model showed that the encoder-decoder model with skip layers fit the crack inspection problem very effective (one paper is published in [J1]).
- **Scalable Weakly-Supervised Learning for Facial AU Detection** 11/2016–04/2017
  Dept. of Electrical and Computer Engineering, The Ohio State University (OSU)

- Developed a scalable weakly-supervised spectral clustering algorithm for learning facial action unit from 1 million web images (published in [C1])
- Results showed that the proposed method can identify and correct inaccurate labels in weakly annotated images, further improving the performance of existing CNN-based models.

- **End-to-End Supervised Facial AU Detection** 04/2015–12/2015
  Institute of Computing Technology, Chinese Academy of Sciences
  - Developed deep region and multi-label learning (DRML) for facial AU detection (published in [C2])
  - The proposed region layer demonstrated effectiveness over standard conv layer (i.e., shared kernels over an entire image) and locally connected layer (i.e., DeepFace by Facebook).
  - DRML has become as a benchmark approach for CNN-based AU detection. Our implementation on GitHub has been forked ∼27 times (`https://github.com/zkl20061823/DRML`).

- **Joint Learning of Facial Region and AU Relations for Expression Analysis** 03/2014–03/2015
  Robotics Institute, Carnegie Mellon University (CMU)
  - Developed a joint patch and multi-label learning (JPML) framework to jointly learn sparse facial patches and a multi-label classifier, with consideration of AU relations (published in [J2, C3])
  - Results showed that the identified local patches are related to active facial regions of different expressions. Considering label relations improves performance for AUs with low base-rate.

- **Structured Multi-task Learning** 09/2013–02/2014
  Statistics Institute, The Ohio State University (OSU)
  - Developed structured multi-label learning algorithms to categorize compound expressions [C4, C5]
  - Results showed that learning multiple expressions with group constraints improves performance for compound expression recognition.

- **Automatic Backlight Detection** 03/2012–07/2013
  Huawei Technologies Co. Ltd, Beijing
  - Led a team to build a scene classification and backlight detection system
  - Filed two patents in China (in confidential status)

Teaching & Mentoring

Beijing University of Posts and Telecommunications
Autumn (17′, 18′), Digital Image Processing, 2-credit course, 3 classes (190 undergraduate students)

Doctoral Student Advisor
Xiaolin Song (17′): Automated Depression Detection Based on Facial Action Units
Shi Pu (15′), Jin Feng (17′): Tracking by Temporal Propagation

Undergraduate Research Projects
Danyi Zhang, Zichen Tian (17′): End-to-end Skin Lesion Segmentation

Undergraduate Thesis Advisor
Danyi Zhang etc., 10 students (17, 18′): Facial Expression Recognition, Skin Lesion Analysis, and Concrete Crack Inspection.

Honors & Awards

Excellent Dissertation Award, CNY ¥10, 000 07/2016
National Scholarship for Excellent Ph.D. Students, CNY ¥20, 000 12/2015
Distinguished Doctorate Student Award (top 3%, 10/300 Ph.D. students), CNY ¥50,000 10/2015
National Scholarship for Abroad Visiting Ph.D. Students, USD $24, 000 03/2013

Publications

Journal

Professional Services

- **Journal reviews**
  - IEEE Transactions on Affective Computing (**TAFFC**) (1)
  - IEEE Transactions on Multimedia (**TMM**) (1)
  - IEEE Transactions on Image Processing (**TIP**) (3)
  - Pattern Recognition (1)
  - Journal of Visual Communication and Image Representation (1)
  - Pattern Recognition Letters (2)
  - Frontiers of Computer Science (1)
- **Conference reviews**
  - AAAI Conference on Artificial Intelligence (**AAAI**) (20')
  - International Conference in Computer Vision (**ICCV**) (19')

- IEEE/CVF Computer Vision and Pattern Recognition (CVPR 19')
- IEEE Winter Conf. on Applications of Computer Vision (WACV 18')
- International Conference on Network Infrastructure and Digital Content (IC-NIDC 18')

Invited Talks

'Computer Vision Crash Course", DOCOMO Beijing Labs, Beijing, 12/2018
"Learning Facial Action Units from Web Images with Scalable Weakly Supervised Clustering", Microsoft Research Asia, Beijing, 05/2018
"Automatic Facial Action Unit Detection", China Academy of Chinese Medical Science, Beijing, 03/2018
"Text Extraction from Natural Scene Image: A Survey", Canon Information Technology (Beijing) Co., LTD, 09/2011

Skills

- **Language**: Python, Matlab, C/C++, Caffe, Tensorflow, LaTeX
- **Platforms**: Unix, Linux
